

Investment Adviser:

Wellington Management Company, LLP (Wellington)

Portfolio Objective

The U.S. Government Money Market Portfolio seeks maximum current income consistent with liquidity and capital preservation. The Portfolio will invest only in short-term securities or related repurchase agreements issued or guaranteed by the government, its agencies, or instrumentalities. Thus, it may have a lower yield than funds that invest in other types of securities. The Portfolio seeks income-producing investments with the credit quality and liquidity to preserve the value of the Portfolio's shares at \$1.00 net asset value (NAV). There is no assurance the Portfolio's objective will be achieved.

Investment Approach

Founded in 1928, Wellington is one of the largest independent investment management companies in the world. Wellington endeavors to maximize yield by anticipating changes in the level of short-term rates and executing sector strategies within the short-term government market. All securities purchased will have minimal credit risk.

An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the Fund. There is no assurance the Fund will be able to maintain a stable \$1.00 NAV per share or that the Fund's objective will be achieved.

The purchase of any investment product is not a condition to the provision or term of any banking service or activity.
